

LIVOS neutral For the allergy-prone and chemically sensitive

LIVOS neutral

Every day we are exposed to a variety of environmental chemicals, and often the air pollution in our living rooms is even larger than outdoors. The continuous confrontation of our bodies with this large number of pollutants often leads to an overload and eventually to the weakening of our immune system. As a result not only allergies increase alarmingly. In the meantime more and more people react also highly sensitive to odorants. Already since the end of the 1980s, LIVOS began to manufacture products, which were particularly suitable to the high requirements of persons suffering from allergies.

During the last years, LIVOS worked increasingly in the development of products to meet the needs of chemically sensitive people as far as possible. LIVOS combined these products in LIVOS neutral.

Products for the allergy-prone and chemically sensitive

LIVOS neutral includes products for almost all applications and surfaces - from a primer to color design up to cleaning and maintenance. An overview of the LIVOS neutral product line can be found on the back.

The selection of the raw materials for LIVOS neutral took place under strict exclusion of all known allergy-causing substances. The development of the individual product was accompanied of tests with allergy-prone and chemically sensitive persons, in cooperation with external institutions.

For more information, contact your LIVOS dealer or directly LIVOS. Use also our web page: www.livos.de.

For exterior use are, due to exposure to wind and weather and the resulting criteria for the selection of raw materials, currently no products available.

To achieve the special properties of LIVOS neutral, they were made without solvents, where it was technically possible. Therefore LIVOS neutral products are not quite as tough as the LIVOS classic products and require a slightly higher maintenance.

Some LIVOS neutral products have among other properties a masking effect. They are also suitable for the renovation of hazardous materials and are therefore represented in the assortment of LIVOS cova as well.

In addition to the full declaration on the labels and in the technical data sheets you will find on our website www.livos.de data sheets with further details such as the CAS-numbers and the concentrations of the used ingredients.
