

LIVOS for Toys

Toys made of solid wood

Children grasp the world

Children take in influences from their environment more intensive than adults - also pollutants. Especially **toys and playground equipment** should be free of harmful substances. So, pay attention that they are free from pollutants already when purchasing!

LIVOS offers paints, oils, varnishes and stains, which protect the **wooden toys and equipment** permanently - without harmful substances. Here you can choose: between colorless and colored, opaque and translucent coatings. All LIVOS products for the children's area are resistant against saliva and sweat according to DIN 53160 and are suitable for toys according to DIN EN 71, part 3. For allergy sufferers, there is **LIVOS neutral** available: products that have very low odor. Inform yourself also about the **creative arts and crafts range** of the LIVOS creative series.

On the back you get a listing for especially suitable products for the painting and treatment of toys and play equipment.

For more information, please contact your **LIVOS** dealer or **LIVOS** directly. You can also use our website at www.livos.de and our hotline +49 (0) 5825 - 88 30.

Your specialist LIVOS dealer or the service team at the factory provides instructions for the usage of the LIVOS products. Please also note the technical data sheets for the individual products.

Pollutants from synthetic paints pollute our air and often lead to diseases of the immune system and allergic reactions. Therefore, healthy interiors require the use of healthy products.

LIVOS offers as the first industrial manufacturer of paints and varnishes made from natural ingredients such products - thus combining more than 38 years of high technical quality with an impressive visual impact, health and environmental protection for the consumer.
