

# KALDET

## All Weather Stain

No. 281

- Wetterlasur
- Lasure Intempéries
- Lasura para intemperie
- Velatura resistente alle intemperie
- Værbeskyttelse

### Protection regardless wind and weather

**KALDET All Weather Stain** is a hydrophobic and thereby vapor permeable stain, which is suitable for the treatment of all exterior wooden surfaces. The only exceptions are walking areas such as terrace and balcony floors.

**KALDET All Weather Stain** reinforces and deepens the natural color of the wood grain, dries in accordance with German Industrial Standard (DIN) 53 160, fast to perspiration and saliva and is applicable by the usual techniques such as painting, spraying and dipping. In doing so the stain is applied in two to three coats at temperatures above 12 °C (53 °F) on dry wood, after it has been primed with a LIVOS product. In order to obtain a protection against blue-staining fungi, we recommend priming using ADAO External Primer No. 259. For oak and chestnut use LINUS Penetrating Oak Priming Oil No. 233.

**KALDET All Weather Stain** is at present available in 13 color tones, which are displayed as samples on the reverse.

For more information as well as our safety advices, please read our Technical Data Sheets or the information panel on our packaging.

Please also contact your local LIVOS retailer or visit our website [www.livos.de](http://www.livos.de) or call our hotline +49(0)5825-8830.
