- **Værbeskyttelse**

Protection regardless wind and weather

DONNOS Penetrating Fence Stain No. 223 is a water-repellent, weather resistant and open-pored stain for exterior use. Among others it is well suited for rough sawn wood and is therefore recommended for fences, stable and barn walls as well as playground equipment, hotbeds and flower boxes. Coatings with DONNOS stay permanently elastic, therefore there is no chipping or peeling off. DONNOS is applied by the usual techniques such as painting, spraying or dipping at temperatures above 15°C (59°F).

DONNOS is at present available in eight color tones, which are inter-mixable. A sample of the different color tones is displayed on the reverse.

For more information as well as our safety advices, please read our Technical Data Sheets or the information panel on our packaging.
